PROFILE SUMMARY

Full-stack software engineer with hands-on experience across backend and frontend development — Laravel, Livewire, React, and TypeScript — backed by production-style projects covering e-commerce, inventory management, and multi-tenant systems. Comfortable owning a feature end to end: designing the database, building the API, and shipping the interface on top of it. Also an active ICT teacher, which sharpened my ability to break down complex technical ideas clearly. Currently deepening skills toward DevOps engineering (containerization, CI/CD, Linux systems) to round out the full delivery pipeline, not just the code.

CAREER OBJECTIVE

To grow as a software engineer building reliable, real-world digital products — while developing toward a DevOps specialization — and to contribute to teams and projects that value clean backend architecture as much as good user experience.

EDUCATION

Laurate Higher Institute of Business and Administration (LAHIBA) - HND

Level 200, Computer Science and Networking · 2024 – 2026

St. Frederick Comprehensive High School, Big Mankon, Bamenda

Advanced Level Certificate · 2022 – 2023

EEC Azire Evening School

Ordinary Level Certificate · 2021

TEACHING EXPERIENCE

ICT / Computer Science Teacher — Seed of Destiny Technical and Grammar College, Bamenda

2024 – Present (ongoing into the new academic year — confirm exact start year)

- Teach theory and practical Computer Science across Form 1 to Form 5
- Deliver Form 4 & 5 curriculum on algorithms, programming languages, Excel, and C programming
- Translate technical concepts into clear, structured lessons for beginner learners

PRACTICAL EXPERIENCE

Backend Development Intern — Skye8 Mobil, Nkwen

18 July – 30 October 2025

- Gained hands-on experience in backend development practices
- Assisted in writing and testing PHP scripts
- Improved understanding of authentication, routing, and database workflows
- Built discipline, teamwork, and problem-solving skills in a real corporate environment

Freelance Graphic Designer — Self-employed

2022 – Present

- Design flyers, posters, and branding materials for individuals and small businesses

Documentation Assistant — God's Seed Documentation, Azire New Church

2022

- Supported clients with typing, printing, scanning, and basic digital tasks

PROJECTS

Reading Space (E-Library System) — flagship project, in development

A digital library platform for cataloging books, tracking member borrowing records, and search — my largest project to date, replacing manual, paper-based library processes.

Stack: Laravel, MySQL, Blade

University Student Management System — group project (team of 7)

A student management system built collaboratively as part of a 7-person team, covering student records, and academic administration workflows.

Stack: TypeScript

NST Herbal Clinic

A Laravel-powered e-commerce and clinic management platform with coupons, consultation booking, and automated email flows.

Stack: Laravel, MySQL, Jetstream, Blade, JavaScript

Invento Track

A multi-tenant inventory and sales management system supporting multiple isolated businesses from one platform.

Stack: Laravel, MySQL, Multi-tenancy

ABN Building Project

Public web presence for a construction and real estate company, including property galleries, blog, and an admin CMS. Containerized and deployed on Render.

Stack: PHP, MySQL, Docker, Render

TECHNICAL SKILLS

Backend: PHP, Laravel, Python, REST APIs

Frontend: React, TypeScript, Laravel Livewire, JavaScript, HTML & CSS, Bootstrap

Database: MySQL

Tools & Design: Git & GitHub, Docker, Linux/Bash, LucidChart (database & class diagram design)

Currently building toward: DevOps Engineering — Docker, CI/CD pipelines, Linux systems administration

Other: Problem Solving, Communication & Teamwork, Graphic Design

CERTIFICATES

- Ordinary Level Certificate
- Advanced Level Certificate

LANGUAGES

- English (Fluent)

PERSONAL STATEMENT

Solving Problems using technology has been my passion since childhood. I learn consistently using online platforms such as **w3schools** and **Youtube** to strengthen my skills as a **software engineer**. I am disciplined willing to work hard, and ready to take full advantage of any training opportunity. My goal is to become a good **Engineer** capable of contributing to **Community** and **National digital growth**.
